

AP BALE CLAMP

The AP bale clamp, type BK, is developed for a secure picking-up of both wrapped and unwrapped round bales. The smooth inside of the arms avoids film damages.

The bale clamp is equipped with several springs to enable an independent arm movement and to make sure the bales will always be clamped. Shifting of the bales is therefore prevented.

Technical specifications

Type	Type quick attachments*	Opening range cm	Weight kg	Suitable for
BK 1800 E	Euro	80 - 180	210	<ul style="list-style-type: none"> • Wheel loader • Tractor with front loader • Telescopic loader
BK 1800 T	Trima - SMS	80 - 180	210	

- Necessary hydraulic power : (max. 50 l./min. - 200 bar)

- Requires : 1 double functioning valve

* Quick attachments are welded on

FEATURES

- Smooth inside avoids film damages
- Arms can move independently, which prevents the bale from shifting
- Simple but robust construction
- Limited maintenance
